American Fiber Cement Corporation Introduces New Facade Panel with Rustic Coated Surface

American Fiber Cement Corporation introduces Deco, a brand-new façade panel with a rustic coated surface. This panel meets the rising demand of architects and builders around the world who want to create a smooth polished look with a natural texture.

Decorative facades are gaining ground in the construction industry. Today, architects and builders around the world are asking for colorful building materials that offer a smooth, natural textured look. To meet the increasing demand, American Fiber Cement Corporation's partner and manufacturer, Cembrit, has created this brand-new design.

Robust, Maintenance-Free Materials

- Directional Grain Visible Through the Acrylic Paint
- High Strength and Durability
- Virtually Maintenance-Free
- Excellent UV Stability
- Resistant to Rough Weather Conditions and Wear for Decades

Deco features a rustic coated surface with a directional grain that is subtly visible through the paint. The panels have a smooth, yet natural look. The combination of the delicate structure and natural texture make it an ideal decorative choice for a façade. Deco is available in 9 colors.
