

PATINA ROUGH NXT

Unique, rough, versatile.
The rough surface gives it
a distinctive character.

PATINA ROUGH NXT

Patina Rough NXT is a colored-throughout fiber cement panel that creates a varied appearance due to its rough, sandblasted surface. Subtle variations in color and texture make each panel unique. Like all variants of the Patina NXT series, Patina Rough NXT forms a fine coating over the years, which gives the facade an individual character.

The exquisite shades support the rough surface in its expressiveness and form a harmonious combination with the other Patina NXT products.

Technical Data

Panels

The panel is colored-throughout and has a velvety, textured surface on the visible side. The panel surfaces are hydrophobized on all sides. Their appearance is reminiscent of natural materials, such as naturally aged sandstone.

Panel format

Swisspearl Largo:

Maximum usable format 3,050 x 1,250 mm, panel thickness 8.0 mm.

For a detailed summary of the sizing and color options, please refer to our delivery program.

Colors

Five standard colors.

Deviations in the color shades of the different panels are a natural part of the production properties underlining the vibrant, expressive character of the material.

Mounting

Visible on wooden substructure:

Bolts with painted head

Visible on metal substructure (aluminum or steel):

Blind rivets with painted head

Technical Data
